

Cosima N. Boswell-Koller, Ph.D.

Bio: Program Director for the Materials Research Science and Engineering Centers (MRSEC), Materials Innovation Platforms (MIP), and National Facilities and Instrumentation (NaFI) programs within the NSF's Division of Materials Research. She obtained her PhD from UC Berkeley and BS from University of Florida. Prior to joining NSF, she served as the Director of the Advanced Manufacturing, Materials, and Processes (AMMP) Program for the National Center for Manufacturing Sciences (NCMS), where she developed, supported, and operated public-private partnerships while also enabling strategic business development activities. Previously, she served as both the Science & Technology (S&T) team lead and Corrosion Acquisition team lead of multiple air vehicle platforms during her time with the Corrosion & Wear Branch at NAVAIR.
