

Fred Kronz, Ph.D.

Program Director, Science and Technology Studies
National Science Foundation

Bio: Fred Kronz is a Program Director for the Science and Technology Studies program, and for the Ethical and Responsible Research program, in NSF's Directorate for Social, Behavioral, and Economic Sciences. He was appointed as a permanent program director in June 2008. In addition to his program responsibilities, he serves a variety of roles in cross-directorate and interagency activities, including the National Nanotechnology Initiative, the National Robotics Initiative, and the Fairness and Artificial Intelligence Program. Before coming to NSF, he was a Philosophy Department faculty member for 23 years at the University of Texas at Austin in the area of philosophy of science.
