

**Stephanie George**

Program Director, Engineering of Biomedical Systems  
National Science Foundation

**Bio:** Dr. Stephanie George is the Program Director for Engineering of Biomedical Systems ([EBMS](#)) within the Chemical, Bioengineering, Environmental and Transport Systems Division ([CBET](#)) at the National Science Foundation (NSF). Dr. George is on “loan” to NSF from East Carolina University where she is an Associate Professor of Engineering. Dr. George resides in a small town in eastern North Carolina with her husband and four children (ages 9 - 17). Although the pandemic has created additional challenges for juggling work and family life, the past few years have taught her to savor the tiny moments and bravely pursue unexpected opportunities.
